

Privacy Policy - TabNews for Even G2

Last updated: September 22, 2026.

The **TabNews** app for Even G2 glasses (package `com.atzingen.tabnews`) is maintained by Gustavo von Atzingen.

Data collected

None. The app does not collect, store or transmit personal data, device identifiers, location, audio or usage information.

Network connections

The app's only network connection is to the public TabNews API at `https://www.tabnews.com.br`, used solely to download titles and bodies of published posts. Requests are anonymous: no account, token, cookie or user data is sent. TabNews may log the phone's IP address as any web server does; see <https://www.tabnews.com.br/termos-de-uso>.

Permissions

- `network` - required to reach the public TabNews API. No other domain is accessed.

The app does not request microphone, camera, location, album or any other permission.

Storage

The app saves only the selected news source and time period in the phone WebView's local storage. These preferences stay on the device and are not sent to servers. The WebView may also keep its temporary cache.

Third parties

The app includes no analytics, ads or tracking tools. It uses the Even Hub SDK to communicate with the Even Realities platform.

Terms of Use - TabNews for Even G2

Last updated: September 9, 2026.

1. The **TabNews** app for Even G2 is an independent, free, open-source reader with no affiliation to TabNews or Even Realities. "TabNews" belongs to its respective owners; the app only displays the platform's public content.
2. Displayed content is written by TabNews users under that platform's rules. The app author does not control, edit or take responsibility for it.
3. The app is provided "as is", without warranties of availability or accuracy. It depends on TabNews' public API and may stop working if the API changes.
4. Mind your surroundings: do not read on the glasses while driving or in situations that require visual attention.
5. Contact: gustavo.von.atzingen@gmail.com
